

CLOSING STATE PARKS IS BAD FOR BUSINESS

We, the undersigned, strongly oppose the closure of 70 California's state parks. Closing our state parks is bad for business and will cause an economic ripple effect to the state's budget and struggling local economies. On average, visitors spend \$57.63 per visit, resulting in \$4.32 billion annually. If parks close, the economic activity generated by visitors will be lost, resulting in a loss of revenue for local business and communities and state coffers.

By signing this petition, we urge the Legislature and Governor to keep our state parks open and **SAVE OUR STATE PARKS!**
